Книга посвящена вопросам качественной методологии и планированию исследовательских проектов. Основная идея книги — показать важную роль исследовательской рефлексии с какими методологическими выборами сталкиваются социальные ученые в процессе качественного исследования. В отличие от классических учебников, где дискуссии об изменчивости объектов исследования и методов их изучения остаются за рамками рассмотрения, авторы коллективного труда проблематизируют такие базовые понятия, как исследование, качество, границы объекта. Включены двенадцать кейсов из области науки, технологий и инноваций, в которых авторы подробно описывают поиск аналитических инструментов. На материалах исследований в интернете, альтернативных мобильностей, стволовых клеток и других инноваций авторы показывают сложность технологий, которые могут выступать как в качестве объекта, так и инструмента исследования. Отдельная часть книги посвящена переосмыслению ролей участников исследовательского процесса и форм сотрудничества, а также новым технологиям в организации совместных форм познания и репрезентации уязвимых групп. Книга таким образом выходит за границы области узко тематической области исследований технологий и инноваций и отражает новейшие дискуссии об изменениях в качественной методологии.
