this book discusses automated computing systems which are mostly powered by intelligent technologies like artificial intelligence machine learning image recognition speech processing cloud computing etc to perform complex automated tasks which are not possible by traditional computing systems the chapters are extended version of research works presented at second phd research symposium in various advanced technologies used in the field of computer science this book provides an opportunity for the researchers to get ideas regarding the ongoing works that help them in formulating problems of their interest the academicians can also be benefited to know about the current research trends that smooth the way to guide their students to carry out research work in the proper direction the industry people will be also facilitated to know about the current advances in research work and materialize the research work into industrial applications this book serves as a comprehensive resource on various traditional advanced and futuristic material technologies for aerospace applications encompassing nearly 20 major areas each of the chapters addresses scientific principles behind processing and production production details equipment and facilities for industrial production and finally aerospace application areas of these material technologies the chapters are authored by pioneers of industrial aerospace material technologies this book has a well planned layout in 4 parts the first part deals with primary metal and material processing including nano manufacturing the second part deals with materials characterization and testing methodologies and technologies the third part addresses structural design finally several advanced material technologies are covered in the fourth part some key advanced topics such as structural design by asip damage mechanics based life prediction and extension and principles of structural health monitoring are dealt with at equal length as the traditional aerospace materials technology topics this book will be useful to students researchers and professionals working in the domain of aerospace materials safety reliability and risk analysis theory methods and applications contains the papers presented at the joint esrel european safety and reliability and sra europe society for risk analysis europe conference valencia spain 22 25 september 2008 the book covers a wide range of topics including accident and incident investigation crisi from the astrophysical scale of a swirling spiral galaxy through the geophysical scale of a hurricane down to the subatomic scale of elementary particles vortical motion and vortex dynamics have played a profound role in our understanding of the physical world kuchemann referred to vortex dynamics as the sinews and muscles of fluid motion in order to update our understanding of vortex dominated flows nasa langley research center and the institute for computer applications in science and engineering icase conducted a workshop during july 9 11 1985 the subject was broadly divided into five overlapping topics vortex dynamics vortex breakdown massive separation vortex shedding from sharp leading edges and conically separated flows some of the experts in each of these areas were invited to provide an overview of the subject this volume is the proceedings of the workshop and contains the latest theoretical numerical and experimental work in the above mentioned areas leibovich widnall moore and sirovich discussed topics on the fundamentals of vortex dynamics while keller and hafez treated the problem of vortex break down phenomena the contributions of smith davis and leballeur were in the area of massive separation and inviscid viscous interactions while those of cheng hoeijmakers and munnann dealt with sharp leading edge vortex flows and fiddes and marconi represented the category of conical separated flows this 2 volume set within the sage reference series on leadership tackles issues relevant to leadership in the realm of science and technology to encompass the key topics in this arena this handbook features 100 topics arranged under eight headings volume 1 concentrates on general principles of science and technology leadership and includes sections on social scientific perspectives on s t leadership key scientific concepts about leading and innovating in s t characteristics of s t leaders and their environments and strategies tactics and tools of s t leadership volume 2 provides case studies of leadership in s t with sections considering leadership in informal communities of scientists and engineers leadership in government projects and research initiatives leadership in industry research development and innovation and finally leadership in education and university based research by focusing on key topics within 100 brief chapters this unprecedented reference resource offers students more detailed information and depth of discussion than typically found in an encyclopedia entry but not as much jargon detail or density as in a journal article or a research handbook chapter entries are written in language and style that is broadly accessible and each is followed by cross references and a brief bibliography and further readings a detailed index and an online version of the work enhances accessibility for today s student audience the new england law review offers its issues in convenient digital formats for e reader devices apps pads and phones this third issue of volume 49 spr 2015 features an extensive and important symposium on educational ambivalence the story of the academic doctorate in law presented by leading scholars on the subject contents include educational ambivalence the rise of a foreign student doctorate in law by gail j hupper the context of graduate degrees at harvard law school under dean erwin n griswold 1946 1967 by bruce a kimball perspectives on international students interest in u s legal education shifting incentives and influence by carole silver a future for legal education by paulo barrozo in addition issue 3 includes these extensive student contributions note the transgender eligibility gap how the aca fails to cover medically necessary treatment for transgender individuals and how hhs can fix it by sarah e gage note breaking the cycle of burdensome and inefficient special education costs facing local school districts by alessandra perna comment scream icon questioning the fair use of street art in seltzer v green day inc by shannon hyle quality digital formatting includes linked notes active table of contents active urls in notes and proper bluebook citations it was on a proposal from the comite national fran a unique guide to the state of the art of tracking classification and sensor management this book addresses the tremendous progress made over the last few decades in algorithm development and mathematical analysis for filtering multi target multi sensor tracking sensor management and control and target classification it provides for the first time an integrated treatment of these advanced topics complete with careful mathematical formulation clear description of the theory and real world applications written by experts in the field integrated tracking classification and sensor management provides readers with easy access to key bayesian modeling and filtering methods multi target tracking approaches target classification procedures and large scale sensor management problem solving techniques features include an accessible coverage of random finite set based multi target filtering algorithms such as the probability hypothesis density filters and multi bernoulli filters with focus on problem solving a succinct overview of the track oriented mht that comprehensively collates all significant developments in filtering and tracking a state of the art algorithm for hybrid bayesian network bn inference that is efficient and scalable for complex classification models new structural results in stochastic sensor scheduling and algorithms for dynamic sensor scheduling and management coverage of the posterior cramer rao lower bound pcrblb for target tracking and sensor management insight into cutting edge military and civilian applications including intelligence surveillance and reconnaissance isr with its emphasis on the latest research results integrated tracking classification and sensor management is an invaluable guide for researchers and practitioners in statistical signal processing radar systems operations research and control theory this book constitutes the refereed proceedings of the third international symposium on human mental workload models and applications h workload 2019 held in rome italy in november 2019 the volume presents one keynote paper as well as 14 revised full papers which were carefully reviewed and selected from 32 submissions the papers are organized in two topical sections on models and applications an analytical model for nonarbitrarily defining the crack initiation length of a notched member on the basis of the minimum total life estimate is proposed this model provides an interpretation of

fatigue notch size effect and a this volume contains the edited version of lectures and selected research contributions presented at the nato advanced study institute on mechanical behaviour of materials at high temperature held in sesimbra portugal 12th 22nd september 1995 and organized by 1st lisbon institute of technology portugal the institute was attended by 88 participants including 15 lecturers from 17 countries including five cp countries the lecturers were leading scientists and technologists from universities research institutions and industry the students were mainly young phd students and junior academic or research staff with postgraduate qualifications msc or phd fourteen students were from the five cp countries the students presented research papers or posters during the institute reporting the current progress of their research projects a total of thirty three lectures ten research papers and fifty posters were presented this book does not contain the poster presentations and seven research papers were selected for publication all the sessions were very active and quite extensive discussions on scientific aspects took place during the institute the advanced study institute provided a forum for interaction among scientists and engineers from different areas of research and young researchers volumes for 1972 include also scientists from the east european countries
