## **Feminisms and Ruralities**

**2014-12-18**

feminist concern with difference has rarely extended to  
rurality even if it is now widely recognized that experiences  
of inequality depend on intersections of several identities in  
each individual life this lack of concern may reflect the urban  
background of the majority of feminist academics or at least  
their urban positionality once in the academy it may  
equivalently be that feminists have been influenced by  
stereotypes of rural women as traditional and reactionary

and thus seen them as unlikely exponents of gender equality and an unfruitful focus for scholarly energies perhaps the problem is a broader one that is reflective of the much documented but still apparent unwillingness of many feminists to recognize and address difference in any of its manifestations regardless even with the recent interest in intersectionality which has necessarily renewed and reenergized debates in feminism about diversity and inclusion the question of how women are differently positioned because of their non metropolitan location has remained largely overlooked

## **Love Is a Story 1999-06-03**

in this groundbreaking work robert sternberg opens the book of love and shows you how to discover your own story and how to read your relationships in a whole new light what draws us so strongly to some people and repels us from others what makes some relationships work so smoothly and others burst into flames sternberg gives us new answers to these questions by showing that the kind of relationship we create depends on the kind of love stories we carry inside us drawing on extensive research and fascinating examples of real couples sternberg identifies 26 types of love story including the fantasy story the business story the collector story the horror story and many others each with its distinctive advantages and pitfalls and many of which are clashingly incompatible these are the largely unconscious preconceptions that guide our romantic choices and it is only by becoming aware of the kind of story we have about love that we gain the freedom to create more fulfilling and lasting relationships as long as we remain oblivious to the role our stories play we are likely to repeat the same mistakes again and again but the enlivening good news this book brings us is that though our stories drive us we can revise them and learn to choose partners whose stories are more compatible with our own quizzes in each chapter help you to see which stories you identify with most strongly and which apply to your partner are you a traveler a gardener a teacher or something else entirely love is a story shows you how to find out

examines social and cultural phenomena through the lens of different television shows we all have opinions about the television shows we watch but television criticism is about much more than simply evaluating the merits of a particular show and deeming it good or bad rather criticism uses the

close examination of a television program to explore that program's cultural significance, creative strategies, and its place in a broader social context. How to Watch Television brings together forty original essays from today's leading scholars on television culture, writing about the programs they care and think the most about. Each essay focuses on a particular television show, demonstrating one way to read the program and through it, our media culture. The essays model how to practice media criticism in accessible language, providing critical insights through analysis, suggesting a way of looking at TV that students and interested viewers might emulate. The contributors discuss a wide range of television programs, past and present, covering many formats and genres, spanning fiction and non-fiction, broadcast and cable, providing a broad representation of the programs that are likely to be covered in a media studies course. While the book primarily focuses on American television, important programs with international origins and transnational circulation are also covered, addressing television series from the medium's earliest days to contemporary online transformations of television. How to Watch Television is designed to engender classroom discussion among television critics of all backgrounds.
