ion exchange system process water softening treatment

Dec 08 2022

an ion exchange system is a vital tool in the world of water treatment and softening this technology utilizes a process where ions are exchanged between a solution and an ion exchange material it is widely used for water purification chemical recovery and to treat water hardness in this article we ll explore how ion exchange systems

engineering surfaces to improve xylene gas sensing

Nov 07 2022

the surface states of gas sensing materials based on oxide semiconductors are closely related to their sensing

dynamics in this work p type znco2o4 architectures with surface engineering are prepared through a feasible hydrothermal strategy followed by subsequent annealing treatment and are applied for inert xylene gas detection

*graduate school of engineering the university of tokyo*
