million passengers travelled through uk airports this title looks at the passenger experience of air travel from purchasing a ticket to boarding the plane including travel to and from the airport check in and security and complaint resolution analytic hierarchy process is one of the most widely known and applied multi criteria decision making methodologies worldwide its potential to analyze complex decision making problems is enormous this makes the methodology a very flexible tool that can be applied in various scenarios social engineering economic political environmental location market share etc

the idea of the book is to present examples and case studies based on a rigorous scientific approach to analytic hierarchy process this book is intended to be a useful resource for anyone who deals with this issue this independent manual provides airport planners and architects with an essential planning guide and reference tool based on the author s extensive experience in the field and involvement in developing best practice airline and airport industry guidelines chapters cover topics such as demand forecasting masterplan development terminal pier and satellite infrastructure baggage handling apron design and airport security provides airport planners and architects with an essential guide and reference tool based on the author s extensive experience discusses key airport planning issues including forecasting demand planning and strategic objectives and airport security outlines important airport planning principles specified by iata for masterplan development featuring evaluation techniques and independent development planning this volume looks at the operational standards and obligations in civil aviation and the consequences of failure to comply with them it covers a wide range of topics both international and complex in measure the ntca conference series is dedicated to publishing peer reviewed proceedings of the conference the goal is to disseminate state of the art scientific results available in the domain of civil aviation these proceedings contain a collection of scientific contributions to the ntca 2017 conference which took place in prague from 7 8 december 2017 and was hosted by the department of air transport czech technical university in prague with the cooperation of the faculty of aeronautics technical university of košice institute of aerospace engineering brno university of technology air transport department university of Žilina and the czech aerospace society the ntca conference aims to build and extend a platform for interaction between communities interested in aviation problems and applications ntca 2017 followed this established practice and provided room for discussing and sharing views on the current issues in the field of aviation as a result these proceedings include contributions on air transport operations air traffic management and economic aspects aviation safety and security aircraft technologies unmanned aerial systems human factors and ergonomics in aviation the manual sets out an internationally agreed framework for the compilation and reporting of statistics on international trade in services in the broad sense it addresses the growing need including in international trade negotiations and agreements for more detailed comparable and comprehensive statistics on this type of trade in its various forms the recommendations will enable countries to progressively expand and structure the information they compile in an internationally comparable way the manual conforms with and explicitly relates to the system of national accounts 1993 and the fifth edition of the imf s balance of payments manual it is published jointly by the united nations european union imf oecd unctad and world trade organization this book provides an authoritative and stimulating account of the issues and problems facing transport planners in the 21st century
