Key Maths 1981 the remarkable system of vedic mathematics was created after careful study of ancient sanskrit texts early last century the vedic system with its direct easy and flexible approach forms a complete system of mental mathematics though the methods can also be written down and brings out the naturally coherent and unified structure of mathematics many of the features and techniques of this unique system are truly amazing in their efficiency and originality being a mental system vedic mathematics encourages creativity and innovation mental mathematics increases mental agility improves memory the ability to hold ideas in the mind and promotes confidence as well as being of great practical use this course consists of three textbooks an answer book and a teacher s guide the course is aimed at 11 14 year old pupils though some of it is very suitable for children from 8 years vedic mathematics is being taught in many schools world wide with great success many top mathematics prizes have been won by students of this system

Geometry 2002 classical euclidean geometry with all its triangles circles and inscribed angles remains an excellent playground for high school mathematics students even if it looks outdated from the professional mathematician s viewpoint it provides an excellent choice of elegant and natural problems that can be used in a course based on problem solving the book contains more than 750 mostly easy but nontrivial problems in all areas of plane geometry and solutions for most of them as well as additional problems for self study some with hints each chapter also provides concise reminders of basic notions used in the chapter so the book is almost self contained although a good textbook and competent teacher are always recommended more than 450 figures illustrate the problems and their solutions the book can be used by motivated high school students as well as their teachers and parents after solving the problems in the book the student will have mastered the main notions and methods of plane geometry and hopefully will have had fun in the process in the interest of fostering a greater awareness and appreciation of mathematics and its connections to other
