**Crises and Integration in European Banking Union** Christopher Mitchell, 2024-02-06 Crises and Integration in European Banking Union builds a theory of how the combination of crisis severity and origin indicates whether a crisis will produce deep reform, modest reform, or a persistence of the pre-crisis status quo.

**European Integration Perspectives in Times of Global Crises** Andreas Kellerhals, Tobias Baumgartner, Corinne Reber, 2023-04-06 With the White Paper on the Future of Europe, the European Commission had launched a debate on fundamental reforms of the Union structures in 2017. A total of five reform scenarios ranged from a reduction and focusing of the Union's competences to increased integration in the sense of a United States of Europe. However, the White Paper did not have any consequences; none of the reform scenarios presented was implemented. However, current global challenges in the areas of health, climate change and energy resources as well as the shift in the global balance of power and related security issues demonstrate the increasing importance of a strong and united Europe. The idea of an "ever closer union", as laid down in the preamble of the 1992 EU Treaty, could experience a renaissance. Against this background, the 13th Network Europe Conference addressed the importance of the integration project in times of global crises and the challenges in various policy areas, as well as the EU's relations with its eastern and southern neighbors and its role vis-à-vis global actors such as China and Russia. This publication contains the conference contributions.

*Insurance and Risk Management for Disruptions in Social, Economic and Environmental Systems* Simon Grima, Ercan Özen, Rebecca E. Dalli Gonzi, 2022-01-24 Insurance and Risk Management for Disruptions in Social, Economic and Environmental Systems is a collection of 13 chapters and studies about Insurance and Risk management in response to disruptions caused by social, economic, and environmental challenges to try and stabilize the economy in an effort to ensure sustainability.

financial instability; the humanitarian crisis and global poverty; the barriers to education and opportunity; and global inequality and its biggest manifestation, global tax havens. Each one presents an immense challenge that requires an urgent global response and solution. All should be on the world's agenda today. None can be solved by one nation acting on its own, but all can be addressed if we work together as a global community. However, Brown remains optimistic that, despite the many obstacles in our way, we will find a path to regeneration via a new era of global order. Yes, there is a crisis of globalisation, but we are beginning to see the means by which it might be resolved. Crises create opportunities and having two at once shouldn't just focus the mind, it might even be seen as giving greater grounds for hope. In *Seven Ways to Change the World*, Brown provides an authoritative and inspirational pathway to a better future that is essential reading for policy makers and concerned citizens alike.

**The Spectre of State Capitalism** Ilias Alami,Adam D. Dixon,2024-07-25 The state is back, and it means business. Since the turn of the 21st century, state-owned enterprises, sovereign funds, and policy banks have vastly expanded their control over assets and markets. Concurrently, governments have experimented with increasingly assertive modalities of statism, from techno-industrial policies and spatial development strategies to economic nationalism and trade and investment restrictions. This book argues that we are currently witnessing a historic arc in the trajectories of state intervention, characterized by a drastic reconfiguration of the state's role as promoter, supervisor, shareholder-investor, and direct owner of capital across the world economy. It offers a comprehensive analysis of this “new state capitalism”, as commentators increasingly refer to it, and maps out its key empirical manifestations across a range of geographies, cases, and issue areas. Alami and Dixon show that the new state capitalism is rooted in deep geopolitical economic and financial processes pertaining to the secular development of global capitalism, as much as it is the product of the geoeconomic agency of states and the global corporate strategies of leading firms. The book demonstrates that the proliferation of muscular modalities of statist interventionism and the increasing concentration of capital in the hands of states indicate foundational shifts in global capitalism. This includes a growing fusion of private and state capital, and the development of flexible and liquid forms of property that collapse the distinction between state and private ownership, control, and management. This has fundamental implications for the nature and operations of global capitalism and world politics. This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations.
