workforce however the agency has not been doing enough to protect resident workers and ensure that migrant workers and sponsoring employers comply with immigration rules a lack of exit controls makes this more difficult the agency estimates there may be 181 000 migrants still in the uk whose permission to remain has expired since december 2008 the points based system is rule based and requires applicants to supply specific documentation to support their applications applicants however have needed more help to understand the rules and the agency has introduced a policy of evidential flexibility allowing caseworkers to request additional information in support of applications to prevent applications being rejected for easily corrected mistakes however this is not applied consistently the committee welcomes plans to introduce an integrated casework system which should provide the information necessary for dealing with these issues and expect to see improved performance once the new casework system is fully operational from 2013 for more than 40 years computerworld has been the leading source of technology news and information for it influencers worldwide computerworld s award winning site computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global it media network for more than 40 years computerworld has been the leading source of technology news and information for it influencers worldwide computerworld s award winning site computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global it media network for more than 40 years computerworld has been the leading source of technology news and information for it influencers worldwide computerworld s award winning site computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global it media network covers employers of various types from 100 to 2 500 employees in size while the main volume covers companies of 2 500 or more employees this book contains profiles of companies that are of vital importance to job seekers of various types it also enables readers to compare the growth potential and benefit plans of large employers a ready reference guide to the e commerce internet business complete profiles of over 400 of the largest most successful corporations in all facets of the internet sector our industry analysis covers b2c b2b online financial services online travel and internet access and usage trends for more than 40 years computerworld has been the leading source of technology news and information for it influencers worldwide computerworld s award winning site computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global it media network for more than 40 years computerworld has been the leading source of technology news and information for it influencers worldwide computerworld s award winning site computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global it media network

Plunkett's E-Commerce & Internet Business Almanac 2008: E-Commerce & Internet Business Industry Market Research, Statistics, Trends & Leading Companies 2007-03

this report focuses on how well the uk border agency has achieved its objectives of an efficient and effective system for managing migration of workers from outside the european economic area the agency implemented a points based system in 2008 which introduced three main routes for people to come to the uk to work replacing the previous 39 types of work visa the system incorporates a route for students to come to the uk to study which is not considered in this report the system works by awarding applicants points based on for example their skills qualifications and salary and requiring them to meet a minimum points threshold the system is objective transparent and flexible as the points required can be modified to respond to changing needs in the uk workforce however the agency has not been doing enough to protect resident workers and ensure that migrant workers and sponsoring employers comply with immigration rules a lack of exit controls makes this more difficult the agency estimates there may be 181 000 migrants still in the uk whose permission to remain has expired since december 2008 the points based system is rule based and requires applicants to supply specific documentation to support their applications applicants however have needed more help to understand the rules and the agency has introduced a policy of evidential flexibility allowing caseworkers to request additional

information in support of applications to prevent applications being rejected for easily corrected mistakes however this is not applied consistently the committee welcomes plans to introduce an integrated casework system which should provide the information necessary for dealing with these issues and expect to see improved performance once the new casework system is fully operational from 2013
