Web Applications

2005

this text explores the core concepts central to the development of three tier client server applications the heart of the book features a thorough exploration of concepts such as dynamically generated pages session state cookies database support and search capabilities

Web Applications using JSP (Java Server Page)

2019-09-18

step by step guide to develop a java based web and enterprise application description application using jsp is a text book and reference for the people who wish to learn and develop a java based web and enterprise application it covers all the major topics in jsp by providing more examples and programs the learner can develop a fully functional web application all the programs are developed and tested with major ide first it takes the learner into the world of web application development through the introductory chapter later on the jsp is introduced to the learner to make the server side scripting easy and elegant two chapters have been dedicated entirely for database handling through jsp using jdbc and hibernate mvc is given to let the learner to integrate features of servlets and jsp producing the html page is not the only way for outputting the results of the web application so two chapters are allotted to teach the learners to output the results of the web application in various forms such pdf word excel key features correct sequence of the chapters that help the learners to become expertise one stop solution for the java based web application development in depth explanation of topics more number of programs are given to understanding the topic developing fully functional application is the primary objective of this instead of teaching merely topics new areas such as apache poi hibernate dedicated chapter for mvc design pattern what will you learn fundamentals of application and java server page developing and executing jsp program scripting elements and implicit objects jsp document and action elements jsp with hibernate database access in jsp exception handling and expression language session management custom tags and filters jstl jsp standard tag library mvc based application apache poi generating pdf document who this book is for graduate post graduate academicians educationists professionals table of contents 1 fundamentals of application 2 fundamentals of java server page 3 developing and executing jsp program 4 scripting elements 5 implicit objects 6 jsp document and action elements 7 exception handling and expression language 8 session management 9 custom tags and filters 10 jstl jsp standard tag library 11 database access in jsp 12 mvc based application 13 apache poi 14 generating pdf document 15 jsp with hibernate

Oracle Web Application Programming for PL/SQL Developers

2003

learn to use oracle 9i to build dynamic data driven sites get step by step details on creating and deploying applications using pl sql html java xml wml perl and php this book covers everything users need to know to master application development in an oracle environment using pl sql

Head First HTML5 Programming

2011-10-06

html has been on a wild ride sure html started as a mere markup language but more recently html s put on some major muscle now we ve got a language tuned for building web applications with storage 2d drawing offline support sockets and threads and more and to speak this language you ve got to go beyond html5 markup and into the world of the dom events and javascript apis now you probably already know all about html markup otherwise known as structure and you know all aboutcss style presentation but what you ve been missing is javascript behavior if all you know about are structure and presentation you can create some great looking pages but they re still just pages when you add behavior with javascript you can create an interactive experience even better you can create full blown web applications head first html5 programming is your ultimate tour guide to creating web applications with html5 and javascript and we give you everything you need to know to build them including how to add interactivity to your pages how to communicate with the world of services and how to use the great new apis being developed for html5 here are just some of the things you ll learn in head first html5 programing learn how to make your pages truly interactive by using the power of the dom finally understand how javascript works and take yourself from novice to well informed in just a few chapters learn how javascript apis fit into the html5 ecosystem and how to use any api in your web pages use the geolocation api to know where your users are bring out your inner artist with canvas html5 s new 2d drawing surface go beyond just plugging a video into your pages and create custom video experiences learn the secret to grabbing five megabytes of storage in every user s browser improve your page s responsiveness and performance with workers and much more

Building Web Applications with UML

2003

conallen introduces architects and designers and client server systems to issues and techniques of developing software for the he expects readers to be familiar with object oriented principles and concepts particularly with uml unified modeling language and at least one application architecture or environment the second edition incorporates both technical developments and his experience since 1999 he does not provide a bibliography annotation copyrighted by book news inc portland or

Learning Web Application Development

2008-03

grasp the fundamentals of web application development by building a simple database backed app from scratch using html javascript and other open source tools through hands on tutorials this practical guide shows inexperienced web app developers how to create a user interface write a server build client server communication and use a cloud based service to deploy the application each chapter includes practice problems full examples and mental models of the development workflow ideal for a college level course this book helps you get started with web app development by providing you with a solid grounding in the process set up a basic workflow with a text editor version control system and web browser structure a user interface with html and include styles with css use jquery and javascript to add interactivity to your application link the client to the server with ajax javascript objects and json learn the basics of server side programming with node js store data outside your application with redis and mongodb share your application by uploading it to the cloud with cloudfoundry get basic tips for writing maintainable code on both client and server

Learning Web App Development

2014-02-13

learn how to create dynamic web applications with google apps script and take full advantage of your google hosted services if you have basic coding skills and some javascript experience this practical book shows you how apps script works and provides step by step guidance for building applications you can use right away apps script is handy for automating google apps tasks but it also serves as a complete application platform with this book you ll learn how to build store run and share data driven web apps right on google drive you ll have access to complete code and working examples that show you how everything fits together build an interactive app ui that runs on most web and mobile browsers create a sample product catalog that displays custom data from a spreadsheet develop an application to generate web forms from templates use apps script to build a simple web based database application design a document workflow builder that users can quickly customize create a google form that lets you select and send email responses debug your code and keep track of script problems after deployment

Google Apps Script

2014-03-24

do you want to learn how to create documents automatically with google apps script this book shows you step by step how to use apps script to supercharge google docs every chapter contains a practical example of using apps script to create a wide range of documents such as invoices sales quotes student reports and conference talk information it starts with relatively simple applications like a master document copier which uses a google form to learning how to create web apps and making your own html forms to be able to email pdfs to potential customers each example builds on the previous ones so you get to understand how to use the document service well as this is the fourth book in the series on apps script it does assume a basic knowledge of apps script javascript and a little html that said every bit of code is explained with links provided to example form sheet and document files tested using the new v8 runtime and updated using the new script editor contents document service overview chapter 1 creating a google doc from a form submission chapter 2 master document copier chapter 3 edit a document template using placeholders chapter 4 making an invoice with multiple items chapter 5 making a document from scratch chapter 6 making student reports with progress bars

2023-08-20

chapter 7 emailing reports as a pdf or as a link chapter 8 create multiple reports in one document chapter 9 email specific conference information chapter 10 sending conference info via a web app chapter 11 update document from data on the web links to all the complete scripts and example files updated 2021

Step-by-step Guide to Google Apps Script 4 - Documents

2020-06-14

nowadays applications are almost omnipresent the has become a platform not only for information delivery but also for ecommerce systems social networks mobile services and distributed learning environments engineering applications involves many intrinsic challenges due to their distributed nature content orientation and the requirement to make them available to a wide spectrum of users who are unknown in advance the authors discuss these challenges in the context of well established engineering processes covering the whole product lifecycle from requirements engineering through design and implementation to deployment and maintenance they stress the importance of models in application development and they compare well known specific development processes like webml wsdm and oohdm to traditional software development approaches like the waterfall model and the spiral model

through the use of hands on examples and case studies to explain complex technologies this comprehensive book takes ajax ruby on rails and flash to the next level by combining them into a framework for developing rich internet applications walks readers through using all aspects of each application looking at the overall architecture and then breaking down the client side and server side technologies while still maintaining a focus on the desired functionality of an application also includes coverage of such various technologies as dhtml javascript xslt java python php and more this book is also available as part of the 4 book javascript and ajax wrox box isbn 0470227818 this 4 book set includes professional javascript for developers isbn 0764579088 professional ajax 2nd edition isbn 0470109491 professional 2 0 programming isbn 0470087889 professional rich internet applications ajax and beyond isbn 0470082801

Introduction to Environmental Data Science

2023-03-13

this book presents on the latest research findings and innovative research methods and development techniques related to the emerging areas of broadband and wireless computing from both theoretical and practical perspectives information networking is evolving rapidly with various kinds of networks with different characteristics emerging and being integrated into heterogeneous networks as a result a number of interconnection problems can occur at different levels of the communicating entities and communication networks hardware and software design these networks need to manage an increasing usage demand provide support for a significant number of services guarantee their qos and optimize the network resources the success of all ip networking and wireless technology has changed the way of life for people around the world and the advances in electronic integration and wireless communications will pave the way for access to the wireless networks on the fly this in turn means that all electronic devices will be able to exchange the information with each other in a ubiquitous way whenever necessary
