Food and Cooking Skills Education Anita Tull,2018-01-29 Food and Cooking Skills Education (FCSE) is a complex mix of policy and practicality, educational theory and pedagogy, classroom and government policy. This book shows how FCSE has been at the centre of a tussle between education and policy for decades. It reviews how FCSE has grappled with various significant issues of concern that threaten to marginalise it and pose problems for educational practicalities, as expectations are increased, but resources are squeezed. It assesses the debate about the significance and importance of acquiring practical food and cooking skills in a society where the purchase of ready-made food has become commonplace, and public knowledge of where our food comes from is noticeably lacking. This has contributed to the escalating incidence of diet-related diseases and the attendant cost to society, and threatened environmental sustainability. In turn, governments have reacted by proposals to make practical cooking skills a statutory National Curriculum subject as part of the armoury for tackling such costs. Based on detailed research conducted across England and Wales, as well as comparisons with thirty-five other countries or states, the author makes recommendations for policy to manage this challenge facing contemporary society.

Climate Neutral and Resilient Farming Systems Udaya Sekhar Nagothu,2022-11-08 This book presents evidence-based research on climate-neutral and resilient farming systems and further provides innovative and practical solutions for reducing greenhouse gas emissions and mitigating the impact of climate change. Intensive farming systems are a significant source of greenhouse gas emissions, thereby contributing to global warming and the acceleration of climate change. As paddy rice farming is one of the largest contributors, and environmentally damaging farming systems, it will be a particular focus of this book. The mitigation of greenhouse gas emissions needs to be urgently addressed to achieve the 2°C target adopted by COP21 and the 2015 Paris Agreement, but this is not possible if local and national level innovations are not accompanied by international level cooperation, mutual learning and sharing of knowledge and technologies. This book, therefore, brings together international collaborative research experiences on climate-neutral and resilient farming systems compiled by leading scientists and experts from Europe, Asia and Africa. The chapters present evidence-based research and innovative solutions that can be applied or upscaled in different farming systems and regions across the world. Chapters also present models and technologies that can be used for practical implementation at the systemic level and advance the state-of-the-art knowledge on carbon-neutral farming. Combining theory and practice, this interdisciplinary book provides guidance which can inform and increase cooperation between researchers from various countries on climate-neutral and resilient farming systems. Most importantly, the volume provides recommendations which can be put into practice by those working in the agricultural industry, especially in developing countries, where they are attempting to promote climate-neutral and resilient farming systems. The book will be of great interest to students and academics of sustainable agriculture, food security, climate mitigation and sustainable development, in addition to policymakers and practitioners working in these areas. Sociology, Work, and Organisations Brian McDonough, Jane Parry, 2024-10-23 This accessible edited collection provides global context for undergraduate and postgraduate students studying the sociology of work and organisations. Composed of short, example-led chapters, this book covers a wide range of contemporary topics, including the COVID-19 pandemic, the digitalisation of work, the gig economy, and the shifting roles of women and other marginalised groups. The book's innovative approach uses case studies as diverse as work-life balance in China, gender pay inequity in Britain and Germany, and the exploitation of workers on the Mexico-US border, to incorporate perspectives from both the Global North and South and provide students with the tools to analyse new developments in the rapidly changing world of work. The book is particularly concerned with inequalities and marginalisation in the workplace, discussing discrimination against women, ethnic minorities, migrants, and older workers. The book also explores how increasing digitalisation, the rise of the gig economy and the COVID-19 pandemic have impacted working practices and how this relates to precarious employment. Other chapters are dedicated to issues of workplace organisation, including female leadership, work-life balance, and well-

being. The book goes on to explore how climate change and policies such as Universal Basic Income may shape the future of work in the near future. Each chapter also includes useful pedagogical resources including practice exam questions, key concepts and definitions, and further readings. Therefore, the book will be therefore essential reading for undergraduate and postgraduate students studying the sociology of work, business management, and organisation.

Out of Milk Lesley Frank, 2020-06-15 “Did you ever go to bed and wonder if your child was getting enough to eat?” For food insecure mothers, the worry is constant, and babies are at risk of going hungry. Through compelling interviews, Lesley Frank answers the breastfeeding paradox: why women who can least afford to buy infant formula are less likely to breastfeed. She reveals that what and how infants are fed is linked to the social and economic status of those who feed them. She exposes the reality of food insecurity for formula-fed babies, the constraints limiting mothers’ ability to breastfeed, and the lengths to which mothers must go to provide for their children. In a country that leaves the problem of food insecurity to charities, public policies are failing to support the most vulnerable populations. Out of Milk calls out the pressing need to establish the economic and social conditions necessary for successful breastfeeding and for accessible and safe formula feeding for families everywhere.

Symbols of Australia Richard White, Melissa Harper, 2021-11-01 But what do they actually mean? Where do they come from? Why are some symbols so hotly contested? Does Australia have more than its fair share? Symbols of Australia offers illuminating and unexpected insights into the symbols that surround us: from Uluru to the Australian flag, the rainbow serpent to Holden cars, the democracy sausage to the Great Barrier Reef. Entertaining, provocative, informative, and often surprising, Symbols of Australia reveals a great deal about the ways nations are imagined – and how they imagine themselves. Just when we most need it, a lively reassessment of the symbols that define us and their commercial and political exploitation. A mixture of scholarly ease and irreverent playfulness that also defines us. – David Malouf, award-winning Australian writer If the nation is imagined, the business of creating its meaningful symbols gives us the very essence of its history. The star-studded cast of Symbols of Australia takes us on a fascinating tour among kangaroos and pavlovas, baggy green caps and rainbow serpents, Holden cars and vegemite jars – and much more besides. On this splendid journey across desert and beach, reef and harbour, city and bush, we see and hear the nation in its full dignity, diversity and dagginess. – Frank Bongiorno, Professor of History, Australian National University Humorous, insightful and profound, this book is a thought-provoking survey of twenty-eight of Australia’s best-known and most significant symbols. Entries range from Indigenous symbols that resonate with meaning, such as the Rainbow Serpent or Uluru, to animals and the natural world, official symbols, cultural practices, and commercial items of consumption. Most importantly, it showcases the agency of ordinary Australians and the role of popular culture in forging national identity. – Associate Professor Hsu-Ming Teo, Macquarie University Symbols of Australia, in this new revised edition, is essential reading for a sure-footed trek into our constant act of becoming ‘Australian’, sifting through the raging cacophony of opinions to distil the most pertinent elements ... all while keeping a sense of humour firmly intact.– Miriam Corowa, journalist, presenter, producer and director This book is a fascinating look at the symbols that have been used to define and represent our nation. At a time when Australian identity is so contested, Symbols of Australia provides invaluable insight and context, overturning long-held assumptions and rattling revered icons. Return on investment analysis of private sector facilitation funds for Rwandan agribusinesses Karis McGill,Eleanor Turner,2020-08-13 This study analyzes the return on investment for an agribusiness facilitation fund implemented in Rwanda. Combining project monitoring data with supplementary surveys and interviews of recipient agribusinesses, we find a positive return on investment in terms of farmer income generated per dollar spent by the US government. To determine the commercial viability of the investments, we estimate the payback period and find the median time it will take a firm to recoup the entire investment through profits is 3.7 years. We estimate the net present value of the entire fund portfolio to be \$12.5 million. These estimates rely on conservative assumptions and likely underrepresent the profitability of the investments. Given the positive returns and commercial viability of the agribusinesses, we examine the fund's role as a first step to "graduate" firms toward investment readiness. Although three firms did access equity investment, we find that the majority of the businesses in the portfolio do not meet investor requirements for deal size and management capacity and are more appropriately financed by commercial lenders. We conclude with recommendations for the implementation and measurement of similar funds.
