The Rise and Fall of National Test Scores Gilbert R. Austin,Herbert Garber,2013-10-22 The Rise and Fall of National Test Scores examines, in some depth, the nature of test score changes over an extended period of time and in a broad range of subject matters and levels of schooling. The book contains chapters contributed by experts on various aspects of educational tests and score interpretation and uses. The text discusses the interpretations of trends in college admissions test scores and questions about the post-admission performance of ethnic minority students. The book examines general school achievement

trends of high school students and the trends observed in broad-based testing programs of the National Assessment of Educational Progress (NAEP). The complexities involved in obtaining dependable data with which to make informed judgments about reading achievement trends are examined. The text further tackles the positive and negative trends in academic achievement in Science with particular emphasis on the effects of curriculum revision; as well as the problems of mathematics testing. The book then describes test score trends and problems in Great Britain and Ireland, with attention given to the similarities and differences of those countries and the United States. Educators, researchers, political leaders, and informed, interested laymen will find the book invaluable.

*Educational Measurement* Robert L. Brennan,2023-10-03 Educational Measurement has been the bible in its field since the first edition was published by ACE in 1951. The importance of this fourth edition of Educational Measurement is to extensively update and extend the topics treated in the previous three editions. As such, the fourth edition documents progress in the field and provides critical guidance to the efforts of new generations of researchers and practitioners. Edited by Robert Brennan and jointly sponsored by the American Council on Education (ACE) and the National Council on Measurement in Education, the fourth edition provides in-depth treatments of critical measurement topics, and the chapter authors are acknowledged experts in their respective fields. Educational measurement researchers and practitioners will find this text essential, and those interested in statistics, psychology, business, and economics should also find this work to be of very strong interest. Topics covered are divided into three subject areas: theory and general principles; construction, administration, and scoring; and applications. The first part of the book covers the topics of validation, reliability, item response theory, scaling and norming, linking and equating, test fairness, and cognitive psychology. Part two includes chapters on test development, test administration, performance assessment, setting performance standards, and technology in testing. The final section includes chapters on second language testing, testing for accountability in K-12 schools, standardized assessment of individual achievement in K-12 schools, higher education admissions testing, monitoring educational progress, licensure and certification testing, and legal and ethical issues.
