

Free pdf Dc 8 maintenance planning document (PDF)

the concept provides guidance for the formulation of maintenance design characteristics needed to achieve the optimum balance of operational effectiveness and life cycle cost the maintenance concept is the framework upon which systems engineering and logistics planning are developed maintenance planning documents maintenance planning documents mpds are provided by aircraft manufacturers to describe the repetitive tasks that are required to maintain their aircraft the primary source of the operators aircraft maintenance program amp is the mpd maintenance planning document sofema aviation services sas sassofia com takes a look at how the aircraft maintenance program comes together this chapter details the main content of an aircraft maintenance program amp including key concepts for its revision and development as well as the maintenance planning document mpd as the main repository document provided by the manufacturer to assist operators download chapter pdf a maintenance plan refers to the strategy of a company in maintaining machinery equipment and other types of assets used for operation having a maintenance plan secures long term success for the company as it enables to improve safety reliability and productivity where a maintenance plan comes in handy maintenance planning is the practice of identifying where when and how maintenance will be carried out to go into slightly greater detail the maintenance planning process includes determining maintenance scheduling maintenance tactics maintenance approaches maintenance goals and objectives and the areas where maintenance will be focused the a320 maintenance philosophy has evolved resulting in a complex multi dimensional maintenance planning document mpd an exploration of the mpd s key changes and the subsequent effect on the planning and grouping of tasks for a320 family aircraft is explored here the a320 family s mpd analysed planned maintenance pm refers to proactive maintenance activities that are planned scheduled ahead of time and documented to keep assets and facilities healthy productive and safe planned maintenance is also an excellent opportunity to check for code updates and ensure that your building is up to date the primary source of the actors aircraft maintenance program amp is the maintenance planning document mpd the mpd are actually an unapproved document and is essentially a repository for multiple maintenance need coming from other documents so called sources such as the airworthiness limitation section als or the a maintenance program is a document which describes the specific maintenance tasks and their frequency of completion necessary for the continued safe operation of those aircraft to which it applies icao a maintenance program establishes compliance with instructions for continuing airworthiness issued by type certificate supplementary type the early revisions of the 787 s maintenance planning document mpd promote a maintenance schedule or programme that is focused on system based rather than structural based task demands at this stage there are relatively few structural tasks in the mpd the maintenance planning document mpd contains all the mrb requirements together with the mandatory scheduled maintenance requirements maintenance planning involves decision making all the time questions such as what activities need to be planned for physical assets or what equipment or systems should be prioritized based on risk are usually answered through the application of technical tools like rcm and rbm this chapter details the main content of an aircraft maintenance program amp including key concepts for its revision and development as well as the maintenance planning document mpd as the maintenance planning document mpd document contains all the mrb requirements plus mandatory scheduled maintenance requirements that may only be changed with the permission of the maintenance planning documents mpds are provided by aircraft manufacturers to describe the repetitive tasks that are essential to maintain their aircraft maintenance planning engineers use the mpd information to develop operator maintenance programs omps that are then submitted to the relevant aviation authority for approval a good maintenance planning document enables the team responsible for maintenance or for managing the service providers to organize itself properly better anticipate the unexpected comply with everyone s working hours and to be more responsive in the event of a technical emergency maintenance planning documents maintenance planning documents mpds are provided by aircraft manufacturers to describe the repetitive tasks that are required to maintain their aircraft powerpoint presentation maintenance plan
