depicting hand-drawn and computer-generated military symbols for situation maps, overlays, and annotated aerial photographs for all types of military operations. The symbology chapters of this manual focus primarily on land military symbols applicable for the Army and Marine Corps. In addition to terminology, this manual includes the following updated lists: approved acronyms and abbreviations with their expansions; two-letter country codes, brevity codes, and their meanings; procedural words; tactical tasks. This manual applies to the active Army, the US Army Reserves, the Army National Guard, and the US Marine Corps. The field manual provides a standardized source document for Army-wide reference on map reading and land navigation. It applies to every soldier in the Army, regardless of service branch, MOS, or rank. This manual also contains both doctrine and training guidance on map reading and land navigation. Part one addresses map reading, and part two addresses land navigation. The appendices include an introduction to orienteering and a discussion of several devices that can assist the soldier in land navigation for soldiers, hunters, climbers, and hikers alike. This is the definitive guide to map reading and navigation. Tactics is the art and science of employing all available means to win battles and engagements. Specifically, it comprises the actions taken by a commander to arrange units and activities in relation to each other and the enemy, filled with diagrams of attack plans, defensive strategies, and troop movements. US Army Tactics Field Manual is the playbook the US Army uses to employ available means to win in combat. This book provides combat-tested concepts and ideas modified to exploit emerging Army and joint capabilities. This book focuses on the organization of forces, minimum essential control measures, and general planning, preparation, and execution considerations for each type and form of combat operation. It is the common reference for all students of the tactical art, both in the field and the Army School System. The Art of Tactics: Common Tactical Concepts and Graphic Control Measures covers the basics of offense, movement to contact, attack, exploitation, pursuit, basics of defensive operations, the area of defense, the mobile defense, the retrograde, security operations, reconnaissance operations, troop movement, relief in place, passage of lines. This manual is designed to prepare the individual soldier and small unit commander to conduct military operations for extended periods of time under the most severe and varying cold weather climatic conditions. The doctrine and techniques in the manual are applicable in any area that has cold weather and snow, with their accompanying operational problems. Troops properly trained in this doctrine and these techniques will be able to fight, live, and move in any cold weather area of the world. From the introduction, enjoy this unabridged, high-quality, double-bit 1957 historic edition reprint of Survival, US Department of the Army Field Manual FM 21-76. Contents include multiple topics related to survival in the wilderness and harsh environments. The six chapters and its associated ten appendixes of this edition of Field Manual FM 5-0, The Operations Process, constitute the Army's view on planning, preparing, executing, and assessing operations. Together with FM 6-0, Mission Command: Command and Control of Army Forces, this manual provides the Army with a common philosophy and language for the exercise of command and control throughout the conduct of operations. This version of FM 5-0 increases the scope of the manual over previous versions from strictly a manual on planning and orders production to a manual that addresses all activities of the operations process. It describes how commanders, with support from their staffs, drive the operations process through battle command. The art and science of understanding, visualizing, describing, directing, leading, and assessing operations to accomplish missions. This change intends to better describe the dynamic relationship among the commander, staff, subordinate commanders, and their staffs, and other military and civilian partners throughout the operations process, not just planning. In addition, FM 5-0 incorporates design within the operations process. Design is an approach to critical and creative thinking that assists commanders in understanding, visualizing, and describing complex problems and developing approaches to manage or solve them. The
