Rural Development in Punjab Autar S. Dhesi,Gurmail Singh,2020-11-29 For many years, agricultural development in Punjab symbolised one of the most successful experiments in rural development. However, this success story seems to be going astray. The crux of the problem, this volume suggests, is that externally driven modernization to meet national food needs pushed Punjab into highly specialized production of wheat and rice, resulting in over-utilisation of natural resources with adverse environmental consequences that jeopardizing the long-term viability and sustainability of the agrarian economy. Stagnating productivity, reduced farm size, falling household incomes, depleting groundwater resources, are only a few of the problems that characterise Punjab's agriculture today. The book establishes clearly that rural development implies more than transformation of traditional agriculture. Apart from ensuring efficient use of limited resources to sustain agricultural production, rural policy should encompass promotion of non-farm activities, investments in social and economic structure and civic amenities.

**Can information help reduce imbalanced application of fertilizers in India?** Fishman, Ram, Kishore, Avinash, Rothler, Yoav, Ward, Patrick S., Jha, Shankar, Singh, R. K. P., 2016-04-01 The imbalanced application of chemical fertilizers in India is widely blamed for low yields, poor soil health, pollution of water resources, and large public expenditures on subsidies. To address the issue, the government of India is investing in a large-scale, expensive program of individualized soil testing and customized fertilizer recommendations, with the hope that scientific information will lead farmers to optimize the fertilizer mix. We conducted a randomized controlled trial in the Indian state of Bihar in what we believe to be the first evaluation of the effectiveness of the program as currently implemented. We found no evidence of any impact of soil testing and customized fertilizer recommendations on actual fertilizer use or the willingness to pay for lacking nutrients (elicited using a Becker-DeGroot-Marschak mechanism). Several factors could be driving these results, including a lack of understanding, lack of confidence in the information's reliability, or the costs of the recommended fertilizer mixes. We provide evidence that suggests lack of confidence is the main factor inhibiting farmers' response

Quality of Life and Climate Change: Impacts, Sustainable Adaptation, and Social-Ecological Resilience Shukla, Kasturi, Patil, Yogesh B., Estoque, Ronald C., López de Haro, Pedro Antonio, 2024-03-07 Quality of Life and Climate Change: Impacts, Sustainable Adaptation, and Social-Ecological Resilience delves into the pressing concerns surrounding climate change and its profound impacts on the quality of life (QoL) experienced by individuals and communities worldwide. This book explores the intricate relationship between climate change, variability, and QoL in both rural and urban settings. It undertakes a detailed review of QoL assessments to examine the extent to which climatic changes and livability conditions are incorporated into existing evaluations. By shedding light on the critical need to consider climatic factors in measuring and comparing QoL, especially in the context of creating aging-friendly and climate-neutral cities, this publication addresses a significant research gap. This book presents prospective themes, including sustainable solutions, mitigation strategies, and models to enhance socio-ecological resilience. The chapters within the book cover a wide range of topics including climatic variations and future projections, technological advancements in climate change mitigation, implications for residential and non-residential areas, industrial solutions, SDG attainment, mitigation strategies, QoL measurement instruments, and urban QoL models. By addressing these themes, the book provides a comprehensive analysis of the complex interactions between climate change, QoL, and the pursuit of sustainable development. This book serves as a valuable resource for researchers, academicians, policymakers, civil society groups, think tanks, government and non-government organizations, international agencies, and other interested parties seeking to deepen their knowledge and capacity in the field of climate change and its impacts on QoL and Sustainable Development Goals (SDGs) attainment.

Examining the Environmental Impacts of Materials and Buildings Brownell, Blaine Erickson, 2020-02-28 Fundamental environmental challenges such as climate change, resource depletion, and pollution are still widely relevant in today's world. Many of these problems have been associated with the architecture, engineering, and construction industries due to the level of resources used in these professions. In recent years, many manufacturers in these fields have expressed the motivation to make necessary changes that would be beneficial to the environment. Despite this progress, there remains a lack of research and assessment on the methods to achieve environmental stability within these architectural fields. Examining the

Environmental Impacts of Materials and Buildings provides emerging research exploring the theoretical and practical aspects of ecological performance within modern building design and materials-based construction. Featuring coverage on a broad range of topics such as life cycle assessment, material flows analysis, and sustainability, this book is ideally designed for architects, civil engineers, construction professionals, environmentalists, ecologists, business practitioners, scientists, policymakers, designers, researchers, and academicians seeking research on current trends in environmental performance within building design.
