Mac OS X Leopard Killer Tips Scott Kelby,Dave Gales,2010-04-07 Killer Tips books are written with one goal in mind: to allow the reader to work faster and smarter. In other books, you'll often find that the most useful information is found in sidebars, tips, and notes. In a Killer Tips book, there's nothing to weed through: it's all sidebars, tips, and notes! Here, Scott Kelby gives you only the best tips and info on Mac OS X Leopard, covering all of the new features, including Time Machine, the revolutionary and completely unique backup system; Spaces, which allows the user to totally customize different window configurations based on their needs; Spotlight, which now allows the user to search across an entire network (not just the user's computer); and much more. Scott Kelby's trademark style—both direct and humorous—is easily accessible to all readers, who will appreciate all the great information here, as well as the book's clear and focused presentation.

USB Embedded Hosts Jan Axelson,2011-11-01 Developers who want to access USB devices from their embedded systems will find a helpful resource in USB Embedded Hosts: The Developer's Guide. This new book from the author of USB Complete shows how small systems can take advantage of the same wealth of USB devices available to conventional PCs. The book begins with a review of USB host communication protocols. Readers then learn which USB host requirements are relaxed for embedded systems and what new requirements some embedded systems must meet. To help in selecting a development platform, the book explores available hardware and software for USB host communications in small systems. The heart of the book focuses on communicating with USB devices. The topics (with example code) include USB drives, keyboards, virtual serial ports, network bridges, mics, speakers, video cameras, and printers, plus devices that don't fit defined USB classes. Also discussed are systems that support both USB host and device functions. The example code is written for the BeagleBoard-xM open development board using a distribution of Linux targeted to small systems. Also covered is how to use Linux commands and utilities to learn about, monitor, and debug communications with USB devices.
