Theory and Practice of International Mediation Jacob Bercovitch, 2011-01-05 This volume brings together some of the most significant papers on international conflict mediation by Professor Jacob Bercovitch, one of the leading scholars in the field. It has become common practice to note that mediation has been, and remains, one of the most important structures of dealing with and resolving social conflicts. Irrespective of the level of political or social organization, of their location in time and space, and of the political sophistication of a society, mediation has always been there to help deal with conflicts. As a method of conflict management, the practice of settling disputes through intermediaries has had a rich history in all cultures, both Western and non-Western. In some non-Western countries (especially in the Middle East and China) mediation has been the most important and enduring structure of conflict resolution. Jacob Bercovitch has been at the forefront of developments in international conflict mediation for more than 25 years, and is generally recognized as one of the most important scholars in the field. His theoretical and empirical analyses have come to define the parameters in the study of mediation. This volume will help scholars and practitioners trace the history of the field, its position today and its future and will be of much interest to all students of mediation, negotiation, conflict management, international security and international relations in general.
