in this remarkable book author matt seiber examines the phenomenon of hidden gun crime in the uk gunfire graffiti is seiber s term for wanton gunfire damage to roadside structures traffic signs notices warning signs and similar targets his investigation reveals that such shootings are not juvenile pranks but a regular activity thought to be mainly the work of determined individuals unlawfully using firearms shotguns handguns and rifles including lethal high velocity weapons emphasizing the perils of unchecked gun use in public places he also demonstrates how the police authorities and media have sought to minimize or ignore the issue stressing the threat to public safety and the dangers involved seiber sets out to enquire where who when and why given the criminality involved in such events and the malevolent nature of covert gun use he questions how it is that gunfire damage is being deliberately overlooked by the authorities seiber s concerns are backed by academic research and the views of a leading criminal psychologist indeed gunfire graffiti raises fundamental questions concerning the extent to which the unlawful acquisition and use of firearms exist in the uk the assumption being that the greater part of roadside gunfire damage is unlikely to be the work of unlicensed or other irresponsible gun users

on november 20 1943 the u s military invaded the tarawa atoll of the gilbert islands as part of the first american offensive in the central pacific region during world war ii this invasion marked more than one first as it was also the introductory test of a doctrine developed during the interwar years to address problems inherent in situations in which amphibious assaults required support by naval gunfire rather than land based artillery in this detailed study donald k mitchener documents and analyzes the prewar development of this doctrine as well as its

application and evolution between the years 1943 1945 the historical consensus is that the test at tawara was successful and increased the efficiency with which u s forces were able to apply the doctrine in the pacific theater for the remainder of the second world war mitchener challenges this view arguing that the reality was much more complex he reveals that strategic concerns often took precedence over the lessons learned in the initial engagement and that naval planners failure to stay up to date with the latest doctrinal developments and applications sometimes led them to ignore these lessons altogether u s naval gunfire support in the pacific war presents an important analysis that highlights the human cost of misinterpreting strategic and tactical realities

final solution is an intelligent and thought provoking short history of the holocaust by historian david cesarani not only does david cesarani draw together and engage with the latest scholarly research making extensive use of previously untapped resources such as diaries and letters from within the ghettos and camps many of them in polish or yiddish and therefore previously largely inaccessible to anglo american scholars but by adopting a rigorously judeocentric approach the whole narrative of the march to genocide and its aftermath the book presents a subtly different timeline which casts afresh the horror of the period and engenders a significant re evaluation of the how and why eschewing some of the more fevered theses about the guilt of the perpetrators and indeed recasting how wide that net should be spread david cesarani s measured and skilful negotiation of a crowded field is as a result all the more devastating

holocaust survivors who were children during the Nazi persecution wrote this collection of memoirs each story bubbled up spontaneously without an interviewer's guidance hence these represent the most permanent memories of their authors childhood experiences this book provides a rare vantage point to look into the diverse lives of children during the holocaust both professionals and adult survivors have often said the children were too young to remember they could not have been more wrong about that I was struck by the fact that the stories were not bitter they did not seek revenge I found the underlying thread in the purpose of the stories to be gifts to the world given in the hope that the stories and the anthology would contribute to other children not having to suffer such events in the future Paul Valent M.
