tubular structures xv contains the latest scientific and engineering developments in the field of tubular structures as presented at the 15th international symposium on tubular structures ists15 rio de janeiro brazil 27 29 may 2015 the international symposium on tubular structures ists has a long standing reputation for being the principal

Scientific Decision Making in Business

1991-11

nowadays applied work in business and economics requires a solid understanding of econometric methods to support decision making combining a solid exposition of econometric methods with an application oriented approach this rigorous textbook provides students with a working understanding and hands on experience of current econometrics taking a learning by doing approach it covers basic econometric methods statistics simple and multiple regression nonlinear regression maximum likelihood and generalized method of moments and addresses the creative process of model building with due attention to diagnostic testing and model improvement its last part is devoted to two major application areas the econometrics of choice data logit and probit multinomial and ordered choice truncated and censored data and duration data and the econometrics of time series data univariate time series trends volatility vector autoregressions and a brief discussion of sur models panel data and simultaneous equations real world text examples and practical exercise questions stimulate active learning and

show how econometrics can solve practical questions in modern business and economic management focuses on the core of econometrics regression and covers two major advanced topics choice data with applications in marketing and micro economics and time series data with applications in finance and macro economics learning support features include concise manageable sections of text frequent cross references to related and background material summaries computational schemes keyword lists suggested further reading exercise sets and online data sets and solutions derivations and theory exercises are clearly marked for students in advanced courses this textbook is perfect for advanced undergraduate students new graduate students and applied researchers in econometrics business and economics and for researchers in other fields that draw on modern applied econometrics

Principles of Econometrics

2014-03-12

mathematics is the language of science as such it is a basic tool for gaining knowledge in any scientific discipline students often wonder why mathematics subjects are also included in economics and business studies any economist should be fluent in mathematical language and capable of applying mathematics in the analysis

modelling and solving of economic problems this book covers a broad range of mathematics topics all of which are essential to gaining the skills required in economics and business professions along with theoretical explanations essential for correctly understanding the concepts involved it includes a large number of numerical examples each chapter is concluded by a collection of exercises with solutions and a self assessment test which are key components of the learning process for each topic

2014 International Conference on Computer, Network

2016-02-08

this book aims at guiding the educators from a variety of available technologies to support learning and teaching by discussing the learning benefits and the challenges that interactive technology imposes this guidance is based on practical experiences gathered through developing and integrating them into varied educational settings it compiles experiences gained with various interactive technologies offering a comprehensive perspective on the use and potential value of interactive technologies to support learning and teaching taken together the chapters provide a broader view that does not focus exclusively on the uses of technology in educational settings but also on the impact and ability of technology to improve the learning and teaching processes the book addresses the needs of researchers educators and other stakeholders in the area of education interested in learning how interactive technologies can be used to overcome key educational challenges
